

Summer Newsletter 2018

Phew! What a hot summer we are having and this has had an effect on sales. Luckily our sister company Elements rainwear has been selling raincoats to southern hemisphere countries such as Australia and New Zealand where presently they are having their wet season! For those of you that don't care about the heat it's time to enjoy your PVC extra soft. This reminded me about a few emails I have received from customers who are concerned about PVC due to all of the hype in the media at the moment. Firstly can I re-assure everyone that every scrap of PVC that we produce is fully recycled in the Middle East where it is used to soften every day products made from PVC such as dustbins, flooring and cladding etc. If you do not want to dispose of an old raincoat into your trash you could always send it to us and we will recycle it for you. We all know that there is so much false information on the internet. It's amazing how someone with no knowledge of chemistry can overnight become an expert and state that PVC can harm you. The fact is that the PVC we use is proven to be perfectly safe (unless you eat raincoats!) The oils that are used to soften PVC are known as phthalates and there is a lot of unfounded fuss about them. Phthalates are one of the most in-depth tested chemicals in the world, scientists have been analysing them for over 50 years and the Plastics industry has reacted to all of their findings. There are very strict EU rules in place for which Phthalates can be used and the document is called the REACH agreement. The REACH agreement has stipulated that the phthalate that is completely safe to use is DINP and this is the plasticiser that PVC-U-LIKE stipulates to all of its suppliers, so you can relax, your fetish is not harming you!

Whilst it has been a bit quiet we have been busy re-stocking with external products like latex clothing and sex toys. We have also been re-stocking our off the shelf range and adding new colours to the range. We have quite a few garments made up in the new extra soft Pearl Pink and Baby blue. These two materials are proving very popular because they are almost as flexible as latex! Two popular items offering these colours are our long raincoat RA01 and two piece suits SU40, see below for a full list of new stock items.

Material News.

4-way stretch PU

We know that some of you prefer the 4-way stretch material which has a lycra backing and is comfortable to wear for long periods of time. We have dabbled with Chinese suppliers and none have matched the quality of our American suppliers who have a superior cloth. Problem is the pound is weak against the dollar and with shipping the American material is extremely expensive so after a lot of research we discovered that the superior materials are in fact being produced in South Korea. We have ordered 3000 meters from Korea which arrive next week w/c 23/7. We have our usual Black and red but we have added a shocking pink (MAS2) to the colour choice so look out for that coming soon!

New in:-

RES5: Shiny Red with white polka dots 0.200 PVC now in stock and available across most garments.

BLM2: Very soft Baby Blue 0.220 PVC now in stock and proving very popular! We still have 5 x rolls of the old BLM1 if you prefer that material.

PIP2: Very soft Pearl Pink 0.200 PVC. Very similar to the Pearl pink we sold many years ago but mega soft and stretchy just like Latex!

Materials now finished.

GRS1: Soft shiny Green has now finished.

NAT3: Semi trans with coloured dots down to last roll.
